Dear Mr Pritchett,

Thanking you for taking the time to talk to me today about the Carter Color Coat site and our requirements for water. As I explained, this is a property owned by the City of Detroit that is being partially cleaned up by the United States Environmental Protection Agency (EPA) using Superfund monies. On Superfund projects that are deemed Time-Critical Actions, such as this one, permits (Federal/State/local) are not required for work on-Site, as specified in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA).

Specifically, Section 121 (e) (1) discusses permits on these sites and EPA's exemptions from any permits for on-Site work.

However, it is my intent to meet any functional portions of the permit requirements, such as using a backflow preventer. If you have any further questions on this matter, please call me at (734) 740-9013.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jeffrey W. Kimble".

Jeffrey W. Kimble, Federal On-Scene Coordinator
United States Environmental Protection Agency
